ANOTHER SLEEPER FROM THE COAST

Beginning this evening the Southern Pacific will send out two Tonopah sleepers from the Sparks yards so as to satisfy the demand for accommodations of travel in this direction. The train arriving this morning was packed beyond capacity, as the southern Pacific took off the regular smoking car and travelers who could not get berths were forced to sit all night on the arm rests of the seats. On the Tonopah & Tide water train from Los Angeles arriving at Goldfield last night over 25 persons for Tonopah were packed into the single combination smoking and baggage car and the conductor informed them that they would not receive their baggage until the next passenger train two days later, as there was not room for both passengers and baggage.

DIVIDE AND TONOPAH CENTERS OF INTEREST FOR THE SPECULATORS

Grimes Divide Mining company appeared on the board in San Francisco today with a crowd of buying orders that sent the price from the pre-organization figure of 20 cents to 32 cents on the peak of the market declining to 30 with sales of 41,000 shares. This is the group organized by a score of local men in a few minutes after George Wingfield announced that he had taken over the Mormon Girl group from the Grimes brothers. Local buyers who were unable to get in with the original allotment have been looking eagerly for the stock to show on the board as the location is considered one of the best in the district and almost certain of catching the big ore body. Another prime favorite with the significant name of Victory was called in San Francisco for the first time opening at 47, selling down to 30 and closing at 42. This is the Synagogue group taken over bodily by Clyde Heller and associates interested in the Belmont and other Philadelphia companies who are also connected with the Belcher company which has just begun to issue its stock. The Victory was taken over from the Tonopah owners on a basis of 20 cents for the entire capitalization. The Victory is credited with being on the direct strike of the Tonopah Divide and the Heller crowd will begin operations as soon as A. I. D'Arcy returns from the bedside of his grandfather.

Until further notice the session will also continue from 9:30 to 1 o'clock and the double daily session will not be resumed without due notice.

Tonopah stocks came in for another whirl, Midway taking the lead by opening at 50, selling up to 53

and closing firm at 45 after filling orders for 67,300 shares. West End opened in New York at \$2.00 and was quoted in San Francisco at the first call \$1.80 closing at \$1.60. Rosetta was one of the star performers, going from 27 to 35 on a buyer and reacting to 31 with sales of 83,000 shares.

(By Associated Press)
LOUISVILLE, April 3.—In line with his formal statement from the bench March 24, Federal Judge Walter Evans in a formal opinion today decided that the war in Europe was legally at an end and that a plea for a new trial on conviction for violating war time military regulations after the armistice was signed has no standing in court.

Judge Evans based his decision upon the address by President Wilson before congress November 11, 1919, in which he said referring to the defeat of Germany "The war thus comes to an end."

TWO COMPANIES USE ONE SHAFT

Manager Ed J. Roberts began work today on the shaft from which he will explore the Belcher and Belcher Extension ground. The shaft is 600 feet in diameter and 100 feet in length and will have to be replaced. The shaft is on the St. Cloud claim of the Belcher estate and within 10 feet of the Extension line and is breaking into the breccia although it was not expected to find the softer formation at less than 300 feet. The plan is to drive southeast on the Belcher and northeast on the Belcher Extension thus going ahead on both groups and saving valuable time and reducing the cost of the initial work over \$10,000. Both companies are conducted under the management of Mr. Roberts and therefore there has not been any trouble in coming to an agreement mutually satisfactory. The shaft will be continued to the 400 foot point before any lateral work will be done, although a station will be cut at 300 feet to enable the companies to do some prospecting.
